

# MEP

# The *Advantage*

We are excited to introduce the Advantage console. The Advantage is made using a fiberglass reinforced ABS, which gives it a very durable structure with a high-end exterior finish. The benefits to this console are that it is open tooling, offers you the opportunity to customize to fit your brand, and is a perfect fit for volume line rates without the added expense of needing multiple tools. If you are looking for a fully customized console, the MEP team is ready to work with you to provide what you are looking for.
